Section I

1. **Site Review type:** The Primary Care Coalition (PCC) has been contracted by the Montgomery County Department of Health and Human Services to conduct Quality Assurance activities as outlined in Montgomery Cares Service Provider Agreements. The Grant Group, LLC was contracted to provide a half day QA review of the Administrative, Financial and Clinical functions of the clinics utilizing selected standards based on primary care clinic practices. Mary's Center for Maternal and Child Care review was conducted on site on March 9, 2010 by Ms. S Orlene Grant, RN, BSN, MSN, President of The Grant Group and Ms. Judith Levy, RN, BSN, MSHA, Senior Health Consultant.
2. **Clinic Information**
 - Mary's Center for Maternal and Child Care
8709 Flower Avenue, Silver Spring, MD 20901
 - Lead Contact Person:
Gina Pistulka, RN, PhD, Chief Nursing Officer

List of participating Senior Staff

Chief Medical Officer	Mark R. Fracasso, MD, MBA, CPE
QI and Outcomes Manager	Bethany Sanders
Human Resources Manager	Andreina Pradas

2009 and 2010 Baseline Review

2009 Baseline Full Day Review	2010 Comparison – Half Day Review
<p>Administration</p> <p>-Mary’s Center has a comprehensive operational policy and procedure manual. Some of the policies on public health reporting and Department of Health resources refer to Washington DC’s Department of Health. Those policies do not reflect Montgomery County’s Department of Health and Human Services requirements or resources.</p>	<p>Administration</p> <p>-Policies and procedures have been revised to reflect Montgomery County Department of Health and Human Services requirements and resources.</p>
<p>-While credentials of providers were approved by the former Chief Operating Officer, request for provider privileges have not been forwarded to the Board for approval.</p>	<p>-The Chief Medical Officer has received written authority from the Board of Directors to approve provider clinical privileges.</p>
<p>-There is an active Quality Improvement Program in place. QI Committee minutes and reports detail areas for improvements and recommendations; however, it was difficult to track those actions to determine if there was improvement and how policies or practices were ultimately impacted.</p>	<p>-QI minutes reflect 360 degree outcomes of recommendations and how policies and procedures have been modified based on those outcomes.</p>
<p>-Specific disaster drills for the Silver Spring site have not yet been put into practice.</p>	<p>-Staff reported participation in disaster drills on a routine basis.</p>
<p>Financial</p> <p>- The Silver Spring clinic is incorporated into the overall Mary’s Center budget.</p>	<p>Financial</p> <p>-The clinic budget continues to be incorporated into the overall budget.</p>
<p>Clinical</p> <p>- Eight electronic health records were reviewed based on criteria established by PCC. There is no evidence of orientation of staff regarding charting requirements.</p>	<p>Clinical</p> <p>- Three electronic health records of Montgomery Cares patients were reviewed based on criteria established by PCC (five available records were for patients not served under Montgomery Cares).</p>
<p>-EHR documentation does reflect the lag time in specialty referrals that may be delayed for 3 months. The 3 month waiting period contributes to delays in diagnosis and treatment until requested testing or consultation is provided.</p>	<p>- There continues to be a 3 month delay in specialty referral, and shortage of mental health services impact care coordination. EHR documentation does reflect the lag time which contributes to delays in diagnosis and treatment</p>

Section II

Executive Summary

Strengths

- EHR/Practice Management systems are fully implemented
- EHR documentation reflects consistency in care, tracking of clinical results and review of medication and treatment compliance
- Utilization of corporate policies/procedures; medical protocols; senior staff support; financial support for new site.
- New employee orientation and on-going education programs on HIPAA and OSHA compliance.

Challenges

- Three month appointment delays for specialty referrals to Providence Hospital, Holy Cross Hospital, Sibley Hospital, Catholic Charities, Project Access and the Crisis Center.
- Securing adequate mental health services continues to be a challenge.

Administrative Section Summary

Governance Standards

- Organization meets legal requirements for 501(c)3
- Organization has a Board of Directors that meets regularly.
- Organization has by-laws.
- Organization has a strategic plan.
- Organization has a process to approve privileging and to review QI activities.

Comments: The Chief Medical Officer has received written authority from the Board of Directors to approve provider clinical privileges.

Access to Care Standards

- Organization is accessible to their target population physically, linguistically, and culturally.
- Hours of operation promote easy access to care.
- Scope of services aligns with Montgomery Cares vision and meets patient's primary care needs.
- Patients are easily able to reach and communicate with clinic staff by phone and in person.
- Policies address access to care after normal operation hours.
- Management Information Systems provides adequate data, documentation and information access.

Comments: EHR documentation reflects the lag time in specialty referrals that may be delayed for 3 months. The 3 month waiting period contributes to delays in diagnosis and treatment until requested testing or consultation is provided. Some clinical tracking issues exist around preventive care.

Management of Human Resources Standards

- Employee and Volunteer Policies are written and provided to each employee and volunteer.
- Written personnel policies comply with applicable local, state, federal labor regulations.
- Operational Policies cover all aspects of day-to-day operations.

Comments: No comments

Risk Assessment Standards

- Systems are in place to assure a safe work environment for patients, providers, and staff.
- Clinic complies with federal and local law.
- Environment is safe and conducive to high quality care.
- Staff is competent and qualified.

Comments: No comments

Clinical Section Summary

Clinical Systems

- Medical Record Review
- Clinical Competency of Staff and Providers
- Clinical Tracking Systems
- Pharmacy Services
- Pharmacy Service Compliance

Comments: Three electronic health records for Montgomery Cares patients were reviewed based on criteria established by PCC. Five available records were not reviewed because these clients are either from Prince George's County or are covered by other funding sources.

Clinical Services

- Routine Clinical Services
- Preventive Services
- Immunization Screening
- Dental Health Care
- Care of Chronic and Acute Diseases
- Obstetric/Perinatal Transition
- Utilization Review Process
- Services to Homeless
- Hospital Care Transition
- Emergency Services Transition
- Radiology Services
- Care Management
- Behavioral Health Services

Comments: Two of the three medical records reviewed were for clients with diabetes. Both records had problem lists and complete immunization records. Medical and family histories were also complete. Specialty visit notes were scanned to include in the EHR. Mary's Center provides comprehensive services to the diabetic clients. The clinic is participating in the Montgomery Cares Emergency Room Utilization Project.

Clinical Performance

- Mammography Screening
- Cervical Cancer Screening
- Colorectal Cancer Screening
- Diabetes Retinal Exam
- Diabetes Foot Exam
- Diabetes Alc Management
- Diabetes Urine Protein Screening
- Diabetes cholesterol screening
- Diabetes BP Measured
- Diabetes BP Control
- Hypertension BP Measured
- Hypertension BP Control

Comments: For purposes of this report, Clinical Performance is evaluated utilizing data from CHLCare or otherwise provided to PCC. Mary's Center utilizes eClinicalWorks and does not report clinical data in CHLCare or to PCC; therefore, no clinical data was reviewed. Of note, however, is that Mary's Center reports annual HEDIS measures for all of their sites combined.

**Clinical Section
Clinical Systems**

Notes:

Facilities 7 and 10 scored 100% in 2009 and 2010.
 Facilities 1 and 11 were not reviewed in 2009 therefore only data for 2010 are shown.

**Clinical Section
Provision of Services**

Notes:

Facilities 7 and 10 scored 100% in 2009 and 2010.
 Facilities 1 and 11 were not reviewed in 2009 therefore only data for 2010 are shown.

**Clinical Section
Clinical Performance**

Notes:

Facilities 4 and Facility 5 both scored 25% in 2009 and 50% 2010.

Facility 3 had data for 2009 only.

Facilities 6 and 7 did not have data for 2009 or 2010.

Facilities 1 and 11 were not reviewed in 2009 and have no data for 2010.

Facilities with no data available are not shown.
